Summary

Seeking opportunities to apply my expertise in Generative AI and LLM-based solutions, while leveraging my past experience in AI/ML to make impactful contributions in a collaborative environment. Focused on building solutions using advanced AI tools like Langchain, Agentic AI, and Retrieval-Augmented Generation (RAG), while continuously upgrading my skills.

Technical Skills

Programming Languages: Python, Django, Flask

AI/ML Tools: Natural Language Processing (NLP), Generative AI, ML Algorithms

Libraries & Frameworks: Pandas, NumPy, TensorFlow, Scikit-learn, Hugging Face Transformers

Web Dev Tools: Git/GitHub, Visual Studio.

Relevant Coursework: Object Oriented-Programming, Database Management System, Software Engineering

Experience

INTECH Creative Services - Software Engineer(AI/ML)

Feb 2023 – Present

- Gained hands-on experience in applying AI/ML solutions to optimize operational processes.
- Collaborated with team members on all stages of project development, from brainstorming problem definitions to implementing and evaluating solutions.
- Developed proficiency in data pre-processing, model training, and evaluation techniques

Projects

Database communication chatbot

- Developed a database communication chatbot leveraging PrestoDB to enable SQL query capabilities on Cassandra databases. Integrated a Language Model (LLM) to convert natural language queries into SQL, enhancing user interaction and simplifying data retrieval.
- This solution streamlined database query processes for non-technical users and improved accessibility to complex datasets.

Legal IntelliSearch

- Developed a Retrieval-Augmented Generation (RAG) framework tailored for legal document processing and analysis. Enabled accurate extraction of relevant information from multiple sources using LLM-powered responses.
- Generate citations and provide direct links to specific document pages for enhanced traceability.
- Highlight relevant text within source documents for user clarity.
- Perform advanced clause comparison across documents, identifying key similarities and differences between clauses from different legal sources, streamlining the process of legal analysis and contract review.

Intelligent HR Assistant

- Developed an Agentic AI-powered HR assistant that simplifies employee access to HR services and internal policy documents through intelligent, goal-driven interactions.
- Designed a multi-tool AI system where tools are dynamically triggered based on user intent, enabling seamless handling of HR tasks such as leave balance queries, holiday lookups, and policy extraction.
- Integrated voice interaction using automatic speech recognition, allowing employees to ask questions naturally and receive real-time responses.
- Utilized a Retrieval-Augmented Generation (RAG) framework to extract accurate answers from HR policy documents, ensuring clarity and compliance in responses

Education

Sankalchand Patel University, Visnagar B.Tech (ICT) 2019-2023, CGPA-8.33	2019 – 2023
Gurkul school of Science, Siddhpur Class XII Percentage:	2018 – 2019
SMT S.B Doshi High School, Nandotra Class X Percentage:	2016 –2017
